

BESTLITE3 DISPLAY PANELS

Jan 2016

Standard 750x95x40mm, 80 column White

Mini 440x95x40mm, 40 column White

Bestlite3 is an intelligent stand-alone LED and TONE annunciator for use in a variety of applications for Hospitals, Clinics, Aged Care facilities and Industry.

The feature of this model is that it can be ordered in single sided or double sided without any increase in physical size. At 40mm width it is the slimmest double sided display available today. The integrated TONE generator includes all Australian standard alert tones.

All displays are tri-colours with RED, GREEN and AMBER on a black background.

Communications uses a proprietary command message protocol that provides simple & reliable visual and audible alert tone information.

The units are addressable, or may be addressed with 'broadcast' messages when required.
